#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 and 11-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Brownscombe et al 5,554,657.

The cited prior art discloses a process and composition for recycling mixed polymer containing PET, comprising synthesizing a modifying polymer from a plurality of monomers and transesterifying the modifying polymer with a condensation polymer such as PET or PEN. The composition may be used for various purposes. See columns 2-4, 10, 11, and 21.

2. Claims 1, 2, 4, 6-8, 11, 12, 14, and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Salsman 5,820,982.

This common-inventor patent discloses water-soluble or water-dispersible and curable polyester resins suitable as binders in various applications, the process for said resins comprising the reaction of a modifying polymer and a condensation polymer to produce a final polymer having uses as claimed. See columns 2-4, and 6-8.

3. Claims 1, 2, 4, 6-9, 11, 12, 14, and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ito et al 6,534,624.

This prior art discloses a process for producing alkyd resins, said process comprising the reaction of a condensation polymer and a modifying polymer to make a final polymer as claimed. See columns 4 and 5.

4. Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claim recites "molecular weight final can be used". It appears "polymer" has been left out.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5, 10, 15, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ito et al '624.

The disclosures of the cited prior art are as discussed supra. Patentees teach that the alkyd resins may be reacted with curing agents which are polyisocyanates, thereby forming Pus. Said alkyds may be useful as adhesives. Said use is well within the limit of skills of the ordinary practitioner in this art, and hence would have been obvious.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SAMUEL A. ACQUAH whose telephone number is 571-272-1065. The examiner can normally be reached on M-TH, FRIDAYS OFF.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAMES SEIDLECK can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
